

Voltage	400 V	Driving power	15 kW
Frequency	50 Hz	Bale height	750 mm
Width	1642/2192 mm	Cycle time in idle operation	33,5 s
Height	2550 mm	Bale weight (max.)	420 kg
Weight	7000 kg	Specific pressing power	58 N/cm ²
Pressing power	480 kN	Loading dimensions	1020 x 1250 mm
Bale length	1200 mm	Length	5158 mm
Bale width	1100 mm	Number of strappings	4

Technical and design modifications reserved.

HSM HL 4812 - Compact horizontal baling press for industry and trading companies

- Very low space requirement
- Compresses cardboard and foils
- Especially large loading aperture for bulky materials
- Suitable for continuous loading (e.g. via conveyer belt)
- Hydraulic counterplate for bale removal ensures optimum operating convenience and safety
- High specific pressing power provides a high compaction of the material and consequently an optimum HGV load
- Intuitive, multilingual operational guidance via graphic description
